

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

I am 16 and a half....i bought a tracfone because i need it when i go out and need to call for a pick up or for anything else....i am very busy and i don't have a job.....raising the rate would just make me and many other people i know stop using the phones that they bought....you would end up with less money that you did before.....i will stop you even if i have to start a strike and get as many people as i can to stop using their phones untill you stop with unfair prices...#@\$.....@\$#.....

Sincerely,

Nathan Garrell
